

Earth Observation for Human Health: The Multi-Angle Imager for Aerosols (MAIA) Mission.

An opportunity to enhance Space cooperation between US and Italy

AGENDA MARCH 1st 2022

PST CET Session CHAIR: S. Zoffoli - ASI

7:15 AM	4:15 PM	NASA-ASI welcome and ASI perspective on mission feasibility <i>Hal Maring - NASA</i> <i>Francesco Longo - ASI</i>
7:25 AM	4:25 PM	Meeting objectives <i>Fabrizia Buongiorno - INGV</i>
7:35 AM	4:35 PM	MAIA investigation and technical overview <i>David Diner - JPL</i>
8:05 AM	5:05 PM	MAIA satellite instrument operations <i>Lori Bator - JPL</i>
8:20 AM	5:20 PM	MAIA data products <i>Scott Gluck - JPL</i>
8:35 AM	5:35 PM	PLATiNO spacecraft overview <i>Vincenzo Pulcino - ASI</i>
8:50 AM	5:50 PM	Project systems engineering approach <i>Stacey Boland - JPL</i>
9:00 AM	6:00 PM	Early Adopters and status of US-Italy community engagement <i>Abigail Nاستan - JPL</i> <i>Cinzia Zuffada - JPL</i>
9:15 AM	6:15 PM	Summary of current plans in Italy, prospects for additional observations, and introduction to discussion

		<i>David Diner - JPL</i>
9:30 AM	6:30 PM	Q&A and discussion
10:15 AM	7:15 PM	Meeting adjourn

AGENDA MARCH 4th 2022

PST	CET	Session CHAIR: F. Buongiorno - INGV
7:15 AM	4:15 PM	Welcome – Meeting objectives <i>Simona Zoffoli - ASI</i>
7:25 AM	4:25 PM	Italian perspectives on MAIA mission exploitation <i>Andrea Taramelli - ISPRA</i>
7:35 AM	4:35 PM	MAIA contribution for Air Quality products in Italy <i>Marco Deserti - ARPAE</i>
7:45 AM	4:45 PM	Liberti Observatory: air pollution monitoring by chemical and remote sensing ground-based measurements <i>Cristiana Bassani – CNR-IIA</i>
7:55 AM	4:55 PM	CNR-ISAC observational capacity over the MAIA italian target regions in support of the mission <i>Francesca Barnaba - ISAC</i> <i>Gian Paolo Gobbi - ISAC</i>
8:05 AM	5:05 PM	Contributions of Arpae Emilia-Romagna to observational, modeling and epidemiological studies relating to air quality and atmospheric pollution <i>Vanes Poluzzi - ARPAE</i>
8:15 AM	5:15 PM	Magnetic methods for the source apportionment of particulate matter <i>Aldo Winkler - INGV</i>
8:25 AM	5:25 PM	Importance of particulate matter speciation in the US and Italy <i>Bart Ostro – University of California, Davis</i>

8:35 AM	5:35 PM	Novel opportunities for epidemiological studies with MAIA <i>Massimo Strafoggia - Lazio Regional Health Service</i>
8:45 AM	5:45 PM	Towards possible synergies between MAIA and PRISMA in monitoring aerosol composition <i>Fabio Del Frate – UNIROMA2</i>
8:55 AM	5:55 PM	The impact of Etna volcanic plume in the eastern Sicily: the possible advantage of the future MAIA mission <i>Claudia Spinetti - INGV</i> <i>Simona Scollo – INGV</i>
9:05 AM	6:05 PM	Dual-wavelength polarimetric lidar retrieval of the volcanic ash cloud during the 2016 Etna eruption <i>Frank Marzano – UNIROMA1</i>
9:15 AM	6:15 PM	Opportunities for validation of MAIA algorithms and data products in Italy <i>Michael Garay – JPL</i>
9:25 AM	6:25 PM	Q&A and discussion
10:00 AM	7:00 PM	Meeting adjourn
