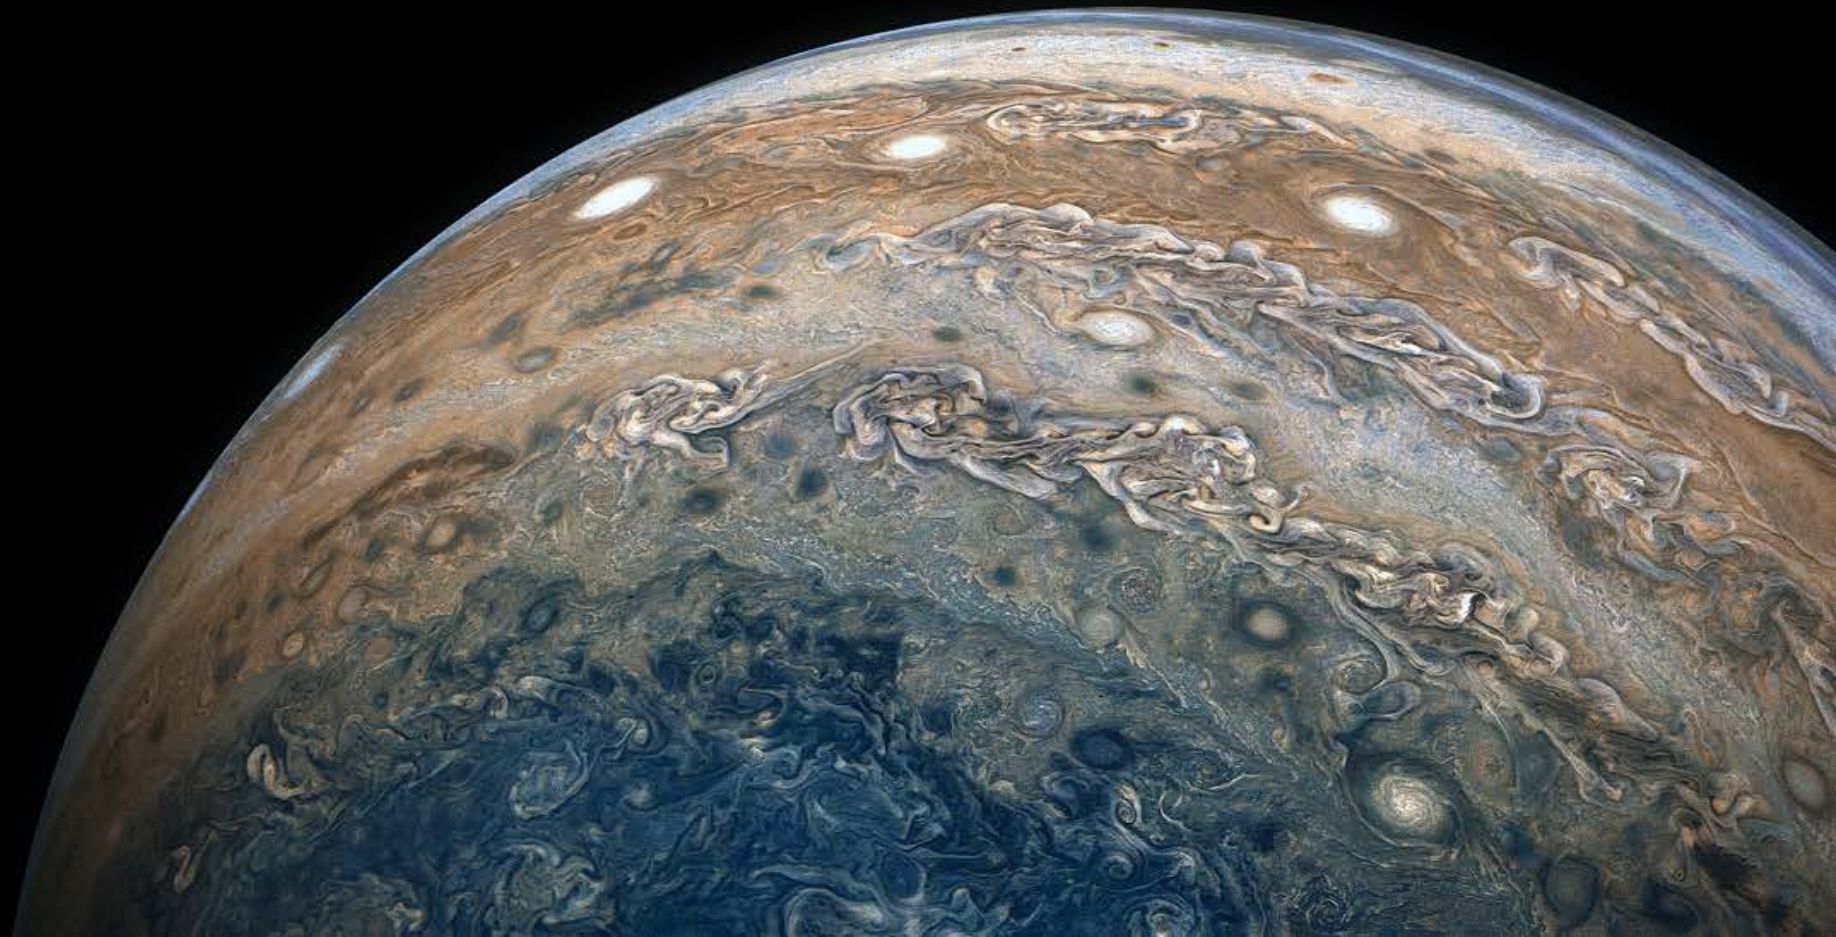
Concurrent Engineering Facility



The Concurrent Engineering Facility (CEF) is built to support complex design and engineering projects involving multidisciplinary teams.

CEF offers the management of any complex space system or product offering support for decision-making processes and reducing the project risks from the beginning.

The facility has dedicated software for design, management and planning activities

Comet
Capella
STK
ASTOS
Catia
Nastran/Patran
ESATAN
ECOSIM
Matlab
Python

The hardware facility

- ✓ Cloud Platform
- ✓ Dedicated workstations
- ✓ Digital dashboard
- ✓ Wireless Sharing Environment
- ✓ Audio/Video system

This is where your
mission will born
