

March 1st, 2024

Opportunities for Industry at Europe's Spaceport - Save the Date: April 16th & 17th 2024.

Dear Industrialist.

On April 16th and 17th ESA in collaboration with CNES, will be hosting a hybrid in-person and online event in which we will be presenting a number of new activities at the Spaceport. The in-person segment of the event will be held at the European Space Operations Centre (ESOC), in Darmstadt, Germany (here). Registration for this event will be free.

The main themes of these opportunities will be the **digital transformation** (eg. <u>5G data network</u>, CMMS, asset monitoring, etc.) and extraordinary **maintenance operations** (smart grid and HVAC, <u>fire safety system REDI</u>, <u>STAR45 antenna renewal</u>, etc.) of the Spaceport.

Further to the informative nature of the event:

- There will be a B2B element, where both online and in-person attendees will be able to connect with each other.
- There will be the opportunity to benefit from a training course on how to submit bids.

Additionally, there will be the opportunity to participate in a guided tour of ESOC during the event.

In order to better prepare you for your eventual participation in the event, it will be ESA's pleasure to arrange a call with you to discuss in further detail the CSG and the context surrounding the Europeanization and Modernization efforts.

To demonstrate your interest for this event and to pre-register, either in person or online, please send your reply to both the following addresses:

CIC <u>Cornelius.Zund@esa.int</u>

STS <u>Enrico.Possamai@esa.int</u>

Why should you participate?

- Unprecedented access to information related to the CSG Launch Range from CNES and ESA, as well as the principal industrial actors of the CSG.
- Pre-arranged B2B meetings, face to face and virtual.
- Two days of networking opportunities and consortium building with other participants.
- The simplest, most effective method to meet other parties interested in the CSG and to
- Become an actor in the CSG ecosystem.
