## Opportunities for Industry at Europe's Spaceport

**Save the Date: 2026 CSG Industry Days September 30<sup>th</sup> & October 1<sup>st</sup>**

Dear Industrialist.

On **September 30<sup>th</sup> & October 1<sup>st</sup>**, ESA in collaboration with CNES will be hosting a hybrid in-person and online event in which will be presented new and upcoming activities at the Spaceport. The in-person segment of the event will be hosted by ESA at its Paris HQ at 8, 10 Rue Mario Nikis, 75738 Paris, France ([HERE](#)). The event will be held 13h – 20h on 30/09, and from 9h – 18h on 10/01.

Themes this year will be opportunities related to investments in improved CSG security and resilience, as well as increased capacity of the payload preparation facilities. Additionally, projects linked to the continued implementation of digital transformation activities and extraordinary maintenance operations of the Spaceport, and others, will continue to be presented.

Some of the subjects that are expected to be covered are the [Services provider tool for spacecraft campaign](#), [Digitalization of operational bypass file \(DIO\)](#), [HTA network upgrading](#), [Electrical control room](#), [HVAC](#), the [telemetry antenna renewal](#), and more, including several others still to be (pre)published.

Further to the informative nature of the event:

- There will be a B2B element, where both online and in-person attendees will be able to connect with each other.
- There will be the opportunity to benefit from a CNES procurement Q&A session.

**Influence the agenda:** Furthermore, ESA is inviting industry to contribute ideas to help shape the event programme. Please tell us which subjects are important to you by participating in the survey [HERE](#).

**Registration:** Registration for this event is now live. The event page can be found here:

For all other questions and concerns please contact:

CFO [Cornelius.Zund@ext.esa.int](mailto:Cornelius.Zund@ext.esa.int)

STS [Enrico.Possamai@esa.int](mailto:Enrico.Possamai@esa.int)

### Why should you participate?

- Unprecedented access to information related to the CSG Launch Range from CNES and ESA, as well as the principal industrial actors of the CSG.
- Pre-arranged B2B meetings, face to face and virtual.
- Networking opportunities and consortium building with other participants.
- The simplest, most effective method to meet other parties interested in the CSG and to become an actor in the CSG ecosystem.
